

Algebra II  
Graphing Review

Name \_\_\_\_\_

Graph each of the following linear equations by making a table of **at least three** values. Show all work and calculations for your table.

1.  $y = 4x + 1$

2.  $2x + 2y = -6$

3. Is  $(-1, 3)$  a point on the graph of #1? Show or explain why or why not.

4. Is  $(2, -5)$  a solution to the equation for #2? Show or explain why or why not.

5. What is the slope of the line in #1? What is the slope of the line in #2?

6. Graph the LINE  $y = -2$ .

7. Graph the LINE  $x = 7$ .
